PROJECT DETAILS

FOOD ORDERING APPLICATION

- The proposed food ordering app will have two main components: an admin interface and a user interface.
- The admin will be able to add, edit, view, and remove food items on the menu.
- while the user can register, log in, place new orders, view order history, and update their profile and used JSON for storing data.
- Overall, the app aims to provide a convenient and streamlined ordering experience for both the restaurant and its customers

HYBRID (SOLAR-WIND) POWER GENERATION

- The combination of renewable energy sources, solar and wind are used for power generation.
- To ensure that the system is available for use throughout the day.
- Mostly used in hilly areas, due to difficulty in erection of transmission lines.
